

# Software Technology Support Center

---

In 1987, the U.S. Air Force selected Ogden Air Logistics Center (OO-ALC), Hill Air Force Base, Utah, to establish and operate its Software Technology Support Center (STSC). It was chartered to be the command focus for proactive application of software technology in weapon, command and control, intelligence and mission-critical systems.

The STSC provides hands-on assistance in adopting effective technologies for software-intensive systems. We help organizations identify, evaluate and adopt technologies that improve software product quality, production efficiency and predictability.

We use the term technology in its broadest sense to include processes, methods, techniques, and tools that enhance human capability. Our focus is on field-proven technologies that will benefit the DoD mission.
